

SCHOOL ROLL 2018

As at August 2018: 577

SCHOOL HIGHLIGHTS

Roselle House

The historic Roselle House that was gifted to the St Kentigern Trust by John Martyn Wilson for the sole purpose of education, has been renovated and restored. It now houses a Learning Commons and the Administration offices of the School. Upstairs has been transformed into a light and airy commons with nooks for quiet reading and open spaces for the boys to work collaboratively. Year 8 student Tom, says "With the new Learning Commons we have a special place – more than we could ever have hoped for."

Service

Expanding on our highly successful annual parent and student Y8 Service trips to Fiji, this year we are also sending a group to Vanuatu. International service organisations have shown that outside groups can provide communities with resources, encouragement and impetus to work towards a better future. Our students

and their parents learn first-hand about the challenges faced and are empowered to be difference makers on a global scale.

School Culture

The staff at Saint Kentigern Boys' School have undertaken a commitment to dissect, discuss and determine what our school culture is. We have been fortunate to have heard from some business leaders in this field who have given insights into effective, positive organisational cultures. This is an exciting initiative that has sparked some fascinating discussions and has inspired the staff.

LOOKING FORWARD

Saint Kentigern Master Plan

The Saint Kentigern Trust Board has announced a comprehensive master plan that sees major developments on all campuses. The Girls' School will be co-located on the Shore Road campus. The Boys' School will have new purpose-built facilities including Senior Classroom Block and shared Specialist Facilities which include Arts, Science and Technology. Planning has begun with construction anticipated through 2020 – 2021 with all new facilities completed and ready for occupation in 2022. We are looking forward to incorporating well researched and innovative teaching and learning spaces into our new buildings.
